

Section Education and Research: Bylaws

Art. 1. Within the Swiss Statistical Society, there is a section called “Education and Research” (“Lehre und Forschung”, “formation et recherche”, “formazione e ricerca”), abbreviated SSS-ER.

Art. 2. The goals of the section are

- Creating and maintaining a network of mathematical and applied statisticians working in educational and research institutions in Switzerland.
- Organising conferences and courses in mathematical and applied statistics, in coordination with the other activities of the SSS and its other sections. In particular, the section will organise specific sessions within the Swiss Statistics Meeting.
- Acting as a partner for federal agencies and other Swiss and foreign institutions and professional societies;
- Providing a national platform for the coordination and the development of education programs in mathematical and applied statistics.

Art. 3. The membership and organisation of the section is ruled by Articles 22 – 26 of the Society’s bylaws.

These bylaws have been approved the constitutional assembly of May 9, 2003, in Berne.

Note: Until the General Assembly of the Swiss Statistical Society (Oct 30, 2003, in Montreux), the Section of Education and Research will be a working group rather than a formal section, since any section is officially created by the General Assembly of the Society.
