

Basel, 27. Januar 2020

Senior (Bio-) statistician 80-100%

The Department of Clinical Research of the University Hospital, Basel, is seeking a motivated (bio-) statistician to start immediately or upon agreement.

Your responsibilities:

- Provide statistical support for researchers of all departments of the University Hospital and associated institutes
- Plan and implement the statistical aspects of clinical and epidemiological research projects, from the design to the implementation and finishing with the analysis, interpretation and publishing.
- Develop and implement new statistical methods
- Be involved in teaching and training of researchers

Your qualifications:

- An advanced academical or professional degree in (bio-/applied) statistics
- Extensive experience in applied (bio-)statistics and/or epidemiology
- Good programming skills, with preference for R
- Experience in clinical research is an advantage
- Knowledge and experience in longitudinal data analysis, marginal structural models or structural equation models is an advantage
- Distinct critical thinking, goal-oriented approach, and capabilities for teamwork
- Fluency in written and spoken English and German

The University Hospital Basel is one of the leading hospitals in Switzerland. Due to our intensive collaboration with the University of Basel and the proximity to several major international life science companies, we are optimally positioned within an innovative knowledge transfer network that operates at the highest level of research, teaching and patient care. Here you will participate in cutting-edge clinical research with interdisciplinary research groups, using a large variety of methods.
